

salt water chlorination with confidence

Fully featured salt chlorinator. Exceptional value.

The SEAL Saltwater Chlorinator combines cutting edge technology and sleek design to provide you with a reliable and fully featured salt water chlorinator, easy to install and program, all at an affordable cost.

Developed in Australia for extreme working conditions, the SEAL Chlorinator was developed by one of the leaders in the field, whose designs are renowned for their quality and reliability. We specify the highest quality electrodes and polymers incorporating the latest nanotechnology to provide a reliable and cost effective sanitizing system. Reverse polarity, self-cleaning, automatic electrode monitoring are only some of the key features common to all models.

Particular attention has been paid to eliminating current leakage around the edges of the electrodes for maximum efficiency.

- Models range from 20,000 lts to 150,000 lts pools
- Reverse Polarity Cleaning
- Output set-points of Low 40%, Medium 70%, High, 100%
- Manual and Automatic Settings
- Low Salt Alarm
- Emergency Low Salt Function
- Water Flow Alarm
- Automatic electrode condition monitoring
- Output control of voltage and current using state of the art feedback technology
- Soft start function during polarity reversal to increase operational life of electrodes
- Software and hardware protection against power spikes
- Efficient flow characteristics in the electrode design
- Very high electrical efficiency and hence chlorine output
- Weatherproof to IP24

Model	Cl Output	Pool Size (lts)	Plates	Min. Salt	Notes
CL20 PUP	7 g/hr	20,000	2	4000 ppm	Standard
CL40 PUP	14 g/hr	40,000	3	6000 ppm	Standard
CL40 H	14 g/hr	40,000	4	4000 ppm	High endurance
CL60	20 g/hr	60,000	4	6000 ppm	Standard
CL60 H	20 g/hr	60,000	7	3000 ppm	High endurance
CL90	30 g/hr	90,000	7	4000 ppm	Standard
CL90 H	30 g/hr	90,000	9	4000 ppm	High endurance
CL120	40 g/hr	120,000	9	6000 ppm	Standard
CL120 H	40 g/hr	120,000	11	4000 ppm	High endurance
CL150	50 g/hr	150,000	11	6000 ppm	Standard
